Study Guide

Message	Welcome to Module 1 (weeks 1 and 2) By now you should have reviewed the course syllabus. If you have any questions, you can either post them to the Office Hours Discussion Board (located in the Discussions area) or email the instructor directly.
Reminders	This Module covers two weeks of the 15-week semester. For online courses, weeks run from Tuesday to Monday. • Saturday - initial Discussion post due • Sunday - WileyPLUS assignment due • Monday - replies to Discussion due • To view voice-over lectures, click on the Media Gallery in the Course Navigation. Use the search bar to find a particular video (see Instructions of this Overview for specific video names). ○ Course Navigation ○ BIOL10210 - Lecture 1 - Chapter 1 ○ BIOL10210 - Lecture 2 - Chapter 2 WILEYPLUS Make sure you have connected to WileyPlus. When you select Chapter 1 WP Assignment, it will ask you to log in and for the access code that you received with your textbook (there is also an option for a free 14 day trial if you haven't purchased the required text/access code yet). Once you have entered your access code, you are ready to continue to the first assignment. There is a WileyPLUS Support Link located in the WileyPLUS Module in Canvas. Please click on this link and speak with a customer representative right away.
Due Dates	• DQ 1: ○ Your initial post is due by 11:59 PM ET on Saturday of Week 1. ○ Your replies are due by 11:59 PM ET on Monday of Week 1. • Chapter 1 WP Assignment is due by 11:59 PM ET on Sunday of Week 1. • Proctoring Onboarding Quiz is due by 11:59 PM ET on Sunday of Week 1. • DQ 2: ○ Your initial post is due by 11:59 PM ET on Saturday of Week 2. ○ Your replies are due by 11:59 PM ET on Monday of Week 2.

Objectives

Chapter 1:

- Define anatomy and physiology and name several branches of these sciences
- Describe the body's six levels of structural organization
- List the 11 organ systems of the human body, their general functions, and the representative organs present in each
- Define the important life processes of the human body
- Explain homeostasis, describe the components of a feedback system, and contrast the operation of negative and positive feedback
- Explain how homeostatic imbalances are related to disorders
- Describe anatomical position
- Relate the anatomical names and the corresponding common names for various regions of the human body
- Define the anatomical planes, anatomical sections, and directional terms used to describe the human body
- Outline the major body cavities, the organs they contain, and associated linings of the cavities
- Describe some of the general anatomical and physiological changes that occur with aging
- Outline the principles and importance of medical imaging procedures in the evaluation of organ functions and the diagnosis of disease
- ***THESE LEARNING OBJECTIVES SHOULD SERVE AS AN EXAM STUDY GUIDE; REFER TO "THINGS TO KNOW FOR PRACTICAL 1" DOCUMENT FOR PRACTICAL STUDY GUIDE***

Chapter 2:

- Identify the main chemical elements of the human body
- Describe the definition and structure of atoms, ions, isotopes, molecules, compounds, and free radicals
- Describe the significance of valence electrons and distinguish between ionic, covalent, and hydrogen bonds
- Describe the various forms of energy and compare exergonic and endergonic chemical reactions
- Explain the role of activation energy and catalysts in chemical reactions and how enzymes function
- Describe synthesis, decomposition, exchange, reversible, and oxidation/reduction reactions
- Describe the properties of water and those of inorganic acids, bases, and salts
- Distinguish among solutions, colloids, and suspensions
- Define pH and explain the role of buffer systems in homeostasis
- Describe the functional groups of organic molecules
- Explain the processes of dehydration synthesis and hydrolysis and the roles of monomers and polymers
- Identify the building blocks, structures, and functions of carbohydrates, lipids, proteins, and

- nucleic acids
- Describe the structure and function of ATP
- **THESE LEARNING OBJECTIVES SHOULD SERVE AS AN EXAM STUDY GUIDE; REFER TO “THINGS TO KNOW FOR PRACTICAL 1” DOCUMENT FOR PRACTICAL STUDY GUIDE**

Instructions

Week 1 - Chapter 1 An Introduction to the Human Body

1. **View** the *Course Navigation* Media Gallery video
 - a. This video will show you how to successfully navigate the course site and introduce you to the various types of assignments.
2. **Read** Chapter 1 in textbook and BIOL10210 - Lecture 1 - Chapter 1 powerpoint
 - a. To view embedded Interaction Animations, you must be in Slide Show view of the powerpoint. You will be taken to the Wiley page once you click on the appropriate link. Select the Play Video arrow.
3. **View** the following videos in the Media Gallery:
 - a. Lecture 1.1 - *Levels of Structural Organization*
 - b. Lecture 1.2 - *Systems of Human Body*
 - c. Lecture 1.3 - *Regional Names*
 - d. Lecture 1.4 - *Directional Terms*
 - e. Lecture 1.5 - *Body Cavities, Body Planes and Sections*
4. **DQ 1:** Create your initial post on the DQ 1 Discussion Board in response to the following question(s):
 - *What are your expectations of this course?*
 - *What are you apprehensive about regarding this course?*
 - *Two truths and a lie: Share information that you feel comfortable with other people knowing about you (educational background, professional employment, hobbies, interests, etc.). Of your 3 statements, 2 of them should be true and 1 should be a lie (don't reveal which is the lie until you are instructed to do so).*
 - *Include your preferred name if different from that on the roster*

After posting, return to the board and read over the posts of your fellow classmates. Choose at least two classmates and create a post responding to their initial post on the Discussion Board.

5. **Chapter 1 WP Assignment.** Complete this assignment in WileyPlus. When you click on the Chapter 1 WP Assignment link in Canvas, you will be taken directly to the Assignment. Your grade will automatically be transferred into Canvas. You can use whatever resources you like (textbook, powerpoint, etc.) to complete this assignment.

- a. You will be given two attempts to answer each question. First attempt correct response = 100%; second attempt correct response= 50%. Responses not correct after the second attempt will receive a zero.
- b. You do not need to complete the assignment in a single sitting. Your grade will automatically adjust as you answer questions.

Week 2 - The Chemical Level of Organization

1. **Read** Chapter 2 in textbook and BIOL10210 - Lecture 2 - Chapter 2 powerpoint
 - a. To view embedded Interaction Animations, you must be in Slide Show view of the powerpoint. You will be taken to the Wiley page once you click on the appropriate link. Select the Play Video arrow.
2. **View** the following videos in the Media Gallery:
 - a. Lecture 2.1 - *Atomic Structures*
 - b. Lecture 2.2 - *Bonds*
 - c. Lecture 2.3 - *Properties of Water*
 - d. Lecture 2.4 - *Carbohydrates*
 - e. Lecture 2.5 - *Lipids*
 - f. Lecture 2.6 - *Proteins*
 - g. Lecture 2.7 - *Nucleic Acids*
3. **DQ 2:** Create your initial post on the DQ 2 Discussion Board in response to the following question(s):
 - o *Discuss something you learned in Chapter 2 that has direct relevance to your health. Be specific, talk about bond types and how the type of bond makes that molecule good for its function or pick a type of molecule and talk about why that molecule is important for health/diet.*

After posting, return to the board and read over the posts of your fellow classmates. Choose at least two classmates and create a post responding to their initial post on the Discussion Board.

4. **Chapter 2 WP Assignment.** Complete this assignment in WileyPlus. When you click on the Chapter 2 WP Assignment link in Canvas, you will be taken directly to the Assignment. Your grade will automatically be transferred into Canvas. You can use whatever resources you like (textbook, powerpoint, etc.) to complete this assignment.
 - a. You will be given two attempts to answer each question. First attempt correct response = 100%; second attempt correct response= 50%. Responses not correct after the second attempt will receive a zero.
 - b. You do not need to complete the assignment in a single sitting. Your grade will automatically adjust as you answer questions.
