Study Guide

Message	Welcome to Module 2 (Weeks 3 and 4)
Reminders	This Module covers two weeks of the 15-week semester. For online courses, weeks run from Tuesday to Monday. • Saturday - initial Discussion post due • Sunday - WileyPLUS Assignment due • Monday - replies to Discussion due WILEYPLUS There is a WileyPLUS Support Link located in the WileyPLUS Module in Canvas. Please click on this link and speak with a customer representative right away if you encounter difficulties.
Due Dates	• DQ 3: ○ Your initial post is due by 11:59 PM ET on Saturday of Week 3. ○ Your replies are due by 11:59 PM ET on Monday of Week 3. • Chapter 3 WP Assignment is due by 11:59 PM ET on Sunday of Week 3. • DQ 4: ○ Your initial post is due by 11:59 PM ET on Saturday of Week 4. ○ Your replies are due by 11:59 PM ET on Monday of Week 4. • Chapter 4 WP Assignment is due by 11:59 PM ET on Sunday of Week 4.

Objectives

Chapter 3:

- Name and describe the three main parts of a cell
- Explain the concept of selective permeability
- Define the electrochemical gradient and describe its components
- Describe the processes that transport substances across the plasma membrane
- Describe the structure and function of organelles
- Explain the processes of transcription and translation and where in the cell they occur
- Discuss the stages, events, and significance of mitosis and meiosis
- Describe how cells differ in size and shape
- Discuss the cellular changes that occur with aging

- **THESE LEARNING OBJECTIVES SHOULD SERVE AS AN EXAM STUDY GUIDE; REFER TO “THINGS TO KNOW FOR PRACTICAL 1” DOCUMENT FOR PRACTICAL STUDY GUIDE**

Chapter 4:

- Name the four basic types of tissues that make up the human body and state the characteristics of each
 - List and describe the five main types of cell junctions
 - List the location, structure, and function of each specific type of epithelial, connective, muscle, and nervous tissue
 - Define membranes and describe their classification
 - Explain the concept of excitability
 - Discuss the role of tissue repair in restoring homeostasis
 - Explain the effects of aging on tissues
-
- **THESE LEARNING OBJECTIVES SHOULD SERVE AS AN EXAM STUDY GUIDE; REFER TO “THINGS TO KNOW FOR PRACTICAL 1” DOCUMENT FOR PRACTICAL STUDY GUIDE**

Instructions

Week 3 - Chapter 3 The Cellular Level of Organization

1. **Read** Chapter 3 in textbook and BIOL10210 - Lecture 3 - Chapter 3 powerpoint
 - a. To view embedded Interaction Animations, you must be in Slide Show view of the powerpoint. You will be taken to the Wiley page once you click on the appropriate link. Select the Play Video arrow.
2. **View** the following videos in the Media Gallery:
 - a. Lecture 3.1 - *Plasma membrane structure*
 - b. Lecture 3.2 - *Tonicity*
 - c. Lecture 3.3 - *Transcription*
 - d. Lecture 3.4 - *Translation*
 - e. Lecture 3.5 - *DNA replication*
 - f. Lecture 3.6 - *Mitosis*
 - g. Lecture 3.7 - *Meiosis*
3. **DQ 3:** Create your initial post on the DQ 3 Discussion Board in response to the following question(s):
 - *Many human physiological disorders are caused by specific problems at the cellular level. Do an internet search and find a disorder that is specifically related to cellular malfunction, describe it briefly, and be sure to include the source you used to find the information (hyperlinks alone are not sufficient reference information). Please be careful to use a reliable source (no Wikipedia). The Rowan library has a site for citation information: <https://libguides.rowan.edu/c.php?g=483141>*

After posting, return to the board and read over the posts of your fellow classmates. Choose at least two classmates and create a post responding to their initial post on the Discussion Board.

4. **Chapter 3 WP Assignment.** Complete this assignment in WileyPlus. When you click on the Chapter 3 WP Assignment link in Canvas, you will be taken directly to the Assignment. Your grade will automatically be transferred into Canvas. You can use whatever resources you like (textbook, powerpoint, etc.) to complete this assignment.
 - a. You will be given two attempts to answer each question. First attempt correct response = 100%; second attempt correct response= 50%. Responses not correct after the second attempt will receive a zero.
 - b. You do not need to complete the assignment in a single sitting. Your grade will automatically adjust as you answer questions.

Week 4 - The Tissue Level of Organization

1. **Read** Chapter 4 in textbook and BIOL10210 - Lecture 4 - Chapter 4 powerpoint
 - a. To view embedded Interaction Animations, you must be in Slide Show view of powerpoint. You will be taken to the Wiley page once you click of the appropriate link. Select the Play Video arrow.
2. **View** the following videos in the Media Gallery:
 - a. Lecture 4.1 - *Epithelial Tissue*
 - b. Lecture 4.2 - *Connective Tissue*
 - c. Lecture 4.3 - *Muscle Tissue and Nervous Tissue*
3. **DQ 4:** Create your initial post on the DQ 4 Discussion Board in response to the following question(s):
 - o *Select a specific tissue (not just a general tissue type). Describe its appearance, types of cells present, function, and locations within the body.*

After posting, return to the board and read over the posts of your fellow classmates. Choose at least two classmates and create a post responding to their initial post on the Discussion Board.

4. **Chapter 4 WP Assignment.** Complete this assignment in WileyPlus. When you click on the Chapter 4 WP Assignment link in Canvas, you will be taken directly to the Assignment. Your grade will automatically be transferred into Canvas. You can use whatever resources you like (textbook, powerpoint, etc.) to complete this assignment.
 - a. You will be given two attempts to answer each question. First attempt correct response = 100%; second attempt correct response= 50%. Responses not correct after the second attempt will receive a zero.
 - b. You do not need to complete the assignment in a single sitting. Your grade will automatically adjust as you answer questions.
