

BIOL10.210 - Objectives for Practical #1 (online A&P I)

Chapter 1

1. identify organ systems and representative organs in Table 1.2
 - adrenal/suprarenal glands (L & R)
 - brain
 - bronchi (L & R)
 - esophagus
 - gallbladder
 - heart
 - kidneys (L & R)
 - large intestine
 - liver
 - lungs (L & R)
 - pancreas
 - parathyroid glands
 - small intestine
 - spinal cord
 - spleen
 - stomach
 - thymus
 - thyroid
 - trachea
 - ureters (L & R)
 - urinary bladder
2. know surface anatomy terms and Figure 1.6
3. know/use body orientation/direction
4. label body planes, and identify the resulting sections/ Figure 1.8
5. label body cavities and their subdivisions (Figure 1.10 & Figure 1.11 a)
6. location/label the 9 abdominopelvic regions (Figure 1.13 a)

(Chapter 2 material will only be included in lecture exam, not lab practical)

Chapter 3

1. identify components and function of cell (Figure 3.1)
2. label parts of plasma membrane (Figure 3.2)
3. label stages of cell cycle and meiosis & identify the specific images of each (Figure 3.34)

Chapter 4

1. identify structure, function, and location of discussed tissues
2. identify microscopic images of tissues:

Epithelium

simple squamous
simple cuboidal
nonciliated simple columnar
ciliated simple columnar
nonciliated pseudostratified columnar
ciliated pseudostratified columnar
stratified squamous
stratified cuboidal
stratified columnar
transitional epithelium

Connective

areolar
adipose
reticular
dense regular

Connective cont

dense irregular
elastic
hyaline cartilage
fibrous cartilage
elastic cartilage
bone
blood

Muscle

skeletal
cardiac
smooth

Nervous

nervous

Chapter 5

1. identify skin layers, cells/structures found in each and tissue composition of layers
2. locate structures in Figure 5.1
3. Figure 5.4 and 5.5 – label hair and nail structures
