

# Quiz 1: Answer Key

Wednesday, March 4, 2026 5:08 PM

|     |                                                                                                                                                                                                                                                                                                    |
|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 : | The command <i>emacs -nw Buildings</i><br>(Topic: <i>emacs</i> )                                                                                                                                                                                                                                   |
|     | <p>Removes a file called <i>Buildings</i>.</p> <p>You chose → Starts up a text editor to edit the file <i>Buildings</i>.</p> <p>Prints a file called <i>Buildings</i> on the local printer.</p> <p>Creates a file called <i>Buildings</i>.</p> <p>Removes a directory called <i>Buildings</i>.</p> |
| 2 : | The command <i>rmdir Stars</i><br>(Topic: <i>rmdir</i> )                                                                                                                                                                                                                                           |
|     | <p>Removes a file called <i>Stars</i>.</p> <p>Prints a file called <i>Stars</i> on the local printer.</p> <p>Creates a file called <i>Stars</i>.</p> <p>You chose → Removes a directory called <i>Stars</i>.</p> <p>Creates a directory called <i>Stars</i>.</p>                                   |
| 3 : | To change the name of a file from <i>Snow</i> to <i>Ice</i> , I would type<br>(Topic: <i>Renaming files</i> )                                                                                                                                                                                      |
|     | <p>mkdir Snow Ice</p> <p>ls Snow Ice</p> <p>grep Snow Ice</p> <p>vi Snow Ice</p> <p>You chose → mv Snow Ice</p>                                                                                                                                                                                    |
| 4 : | To display the names of all the files in directory <i>Rivers</i> , I would type<br>(Topic: <i>Directory listing</i> )                                                                                                                                                                              |
|     | <p>mkdir Rivers</p> <p>vi Rivers</p> <p>You chose → ls Rivers</p> <p>cp Rivers</p> <p>grep Rivers</p>                                                                                                                                                                                              |
| 5 : | The command <i>ls Stars</i><br>(Topic: <i>ls</i> )                                                                                                                                                                                                                                                 |
|     | <p>Removes a directory called <i>Stars</i>.</p> <p>Creates a file called <i>Stars</i>.</p> <p>Prints a file called <i>Stars</i> on the local printer.</p> <p>Removes a file called <i>Stars</i>.</p> <p>You chose → Displays the names of the files in directory <i>Stars</i>.</p>                 |
| 6 : | The command <i>cat Oceans</i>                                                                                                                                                                                                                                                                      |

|             |                                                                                                                                                                                                                                                                                                                                                                         |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             | <i>(Topic: cat)</i>                                                                                                                                                                                                                                                                                                                                                     |
|             | <p>Removes a directory called <i>Oceans</i>.</p> <p>You chose → Displays the contents of the file <i>Oceans</i>.</p> <p>Lists the names of the files in directory <i>Oceans</i>.</p> <p>Creates a file called <i>Oceans</i>.</p> <p>Creates a directory called <i>Oceans</i>.</p>                                                                                       |
| <b>7 :</b>  | The command <i>vi Students</i><br><i>(Topic: vi)</i>                                                                                                                                                                                                                                                                                                                    |
|             | <p>Creates a directory called <i>Students</i>.</p> <p>Displays the names of the files in directory <i>Students</i>.</p> <p>Prints a file called <i>Students</i> on the local printer.</p> <p>Removes a directory called <i>Students</i>.</p> <p>You chose → Starts up a text editor to edit the file <i>Students</i>.</p>                                               |
| <b>8 :</b>  | The command <i>vi Books</i><br><i>(Topic: vi)</i>                                                                                                                                                                                                                                                                                                                       |
|             | <p>Displays the names of the files in directory <i>Books</i>.</p> <p>Creates a file called <i>Books</i>.</p> <p>You chose → Starts up a text editor to edit the file <i>Books</i>.</p> <p>Creates a directory called <i>Books</i>.</p> <p>Removes a directory called <i>Books</i>.</p>                                                                                  |
| <b>9 :</b>  | The command <i>mv Stars Planets</i><br><i>(Topic: mv)</i>                                                                                                                                                                                                                                                                                                               |
|             | <p>Makes a copy of the file <i>Stars</i>, called <i>Planets</i>.</p> <p>Deletes the files <i>Stars</i> and <i>Planets</i>.</p> <p>You chose → Renames the file <i>Stars</i> so that it has the name <i>Planets</i>.</p> <p>Prints the file <i>Stars</i> on a printer called <i>Planets</i>.</p> <p>Creates two directories, called <i>Stars</i> and <i>Planets</i>.</p> |
| <b>10 :</b> | The command <i>ls Books</i><br><i>(Topic: ls)</i>                                                                                                                                                                                                                                                                                                                       |
|             | <p>Removes a directory called <i>Books</i>.</p> <p>Removes a file called <i>Books</i>.</p> <p>Starts up a text editor to edit the file <i>Books</i>.</p> <p>You chose → Displays the names of the files in directory <i>Books</i>.</p> <p>Creates a directory called <i>Books</i>.</p>                                                                                  |
