

Quiz 2: Answer Key

Wednesday, March 4, 2026 5:10 PM

1 :	A language that was developed by adding object-oriented features to the language C was (Topic: History)
	You chose → C++ COBOL ALGOL LISP Pascal
2 :	One example of a logic programming language is (Topic: Programming Paradigms)
	You chose → Prolog Ada COBOL Scheme
3 :	High level languages were an important advance over assembly languages because (Topic: History)
	High-level language programs produce more efficient executable code than assembly language programs do. Only high-level languages exist for the Intel family of computers; there is no assembly language for these machines. You chose → High-level languages are portable from one machine to another.
4 :	One pure object-oriented scripting language is (Topic: History)
	ALGOL COBOL You chose → Ruby C
5 :	One language that was designed primarily for mathematical and scientific programming was (Topic: History)
	FLOW-MATIC You chose → FORTRAN BASIC Pascal COBOL
6 :	Array bounds-checking was deliberately included in the Java programming language. This gives Java greater (Topic: Language evaluation criteria)

	Readability You chose → Reliability Efficiency
7 :	One language that was designed primarily for implementing an operating system was (Topic: History)
	You chose → C FORTTRAN COBOL BASIC Pascal
8 :	One scripting language that was designed for use in Web applications was (Topic: History)
	BASIC LISP C COBOL You chose → PHP
9 :	One language that was designed primarily for teaching novice programmers was (Topic: History)
	C++ FORTTRAN You chose → Pascal COBOL C
10 :	One of the earliest object-oriented languages was (Topic: History)
	You chose → Smalltalk ALGOL Java Python COBOL
11 :	Simula had a strong influence on the concepts embodied in the (Topic: History)
	Scripting languages Logic programming languages Functional languages You chose → Object-oriented languages
12 :	One language that was designed primarily for teaching novice programmers was (Topic: History)

	Java You chose → BASIC LISP Ada
13 :	One language that was designed primarily for use in artificial intelligence was (Topic: History)
	FORTRAN Ada COBOL C You chose → LISP
14 :	One example of an imperative programming language is (Topic: Programming Paradigms)
	Prolog Scheme ML You chose → FORTRAN
15 :	One example of a functional programming language is (Topic: Programming Paradigms)
	Ada You chose → Scheme ALGOL Prolog
